

ON-STAND DEMOS

Exhibitors will be showcasing their products and services on their stands throughout the two day event. Here is your chance to meet with them for a live presentation of their products and offerings & find out how the services of our select vendors would work for your business.

DataKitchen B251

DataKitchen DataOps Platform Demonstration

Learn how to automate and coordinate all the people, tools, and environments in your data analytics organization – everything from orchestration, testing and monitoring to development and deployment.

Plain Concepts B175

Reduce costs & improve collaboration with Augmented Reality (HoloLens2 demo)

Have fun with our two Remote Maintenance and Healthcare demos, experience the magic of Augmented Reality with the HoloLens 2 device, and learn more about how you can leverage technologies to solve your business challenges, irrespective of industry

Pyramid Analytics B122

Better than the Rest! Come and find out why!

Drop by the Pyramid booth B122 for a lightening tour of key highlights of Pyramid and understand why this server based, highly scalable and secure analytic platform has won numerous analyst awards and consistently ranks No. 1 for functionality and value for money.

Qlik B265

From Data Lake to Data Marketplace: Rethinking the Analytics Pipeline

The ever-increasing demands for data drives new levels of complexity. Visit Qlik to see how you can quickly manage, prepare and deliver analytics ready data, via secure and governed enterprise wide catalogues, to every business user and allow them to seamlessly publish to any BI tool of choice; Tableau, PowerBI and Qlik.

Qlik B265

The Future of Data Warehousing

The world of data warehousing is evolving quickly; enterprises today need more agility and scalability so are incorporating new technologies into their data warehousing strategy to meet their goals. Attend this talk to learn how to future-proof your modern data warehousing environment to meet the needs of the business for the long term.

Simplify IT B270

GPU Use Cases with NVIDIA and Simplify IT

Join Simplify IT and NVIDIA for a series of demonstrational videos on NVIDIA GPU use cases across a range of sectors and platforms and how this can help to transform your business processes.

Striim B115

How to reduce public cloud migration risk with change data capture powered by Striim

One of the main barriers to cloud adoption of existing on premises applications is the risk of relying on untested cloud databases. Striim helps mitigate this by enabling phased adoption through change data capture (CDC) technology, allowing customers to keep their source and target databases in sync for years at a time, and fully test that their application tier is optimized for the new cloud database.

Tamr B170

Human Guided Machine Learning

Learn how to master your data using human guided machine learning.

Tiger Analytics B255

Delivering Value in the Age of AI

What exactly is an AI solution? While the term is used ubiquitously today, it isn't evident what AI solutions are and how they deliver value to businesses. This demonstration by Tiger Analytics – a cutting-edge AI and advanced analytics solution provider to Fortune 500 businesses – will showcase solutions that harness varied sources of data such as video, image, audio to generate real and tangible business value.

Western Digital B188

Data Makes Possible

Everywhere data is captured, preserved, accessed and transformed. Western Digital is leading the charge to unlock its potential. From advanced data centres to mobile sensors and personal devices, our industry-leading technology solutions are creating environments for data to thrive – leading to deeper connections, breakthrough discoveries and smarter decisions.
